

## **FOCUS OF OUR KINDERGARTEN**

Private kindergarten Rosemarie follows the goals and mission of the State Educational Program for pre-primary education in kindergartens, which was approved by the Ministry of Education of Slovak Republic. The main goal of education and training in kindergarten is to achieve the optimal cognitive, sensorimotor and socio-emotional level of the child, as a basis for school education in elementary school and for the life in society. The general goals of the education and training of the kindergarten are listed in the School Educational Program of our kindergarten "My Day".

The specific focus of our kindergarten results from the requirements of society.

Sometimes it is difficult to keep up with the trend of society and make sure that our children can handle the increased pressure of demands on their personality. We have set our own educational goals in accordance with the above, so that kids can experience this important age in a peaceful, creative and natural environment. We try to ensure that children's daily learning activities are carried out outside, preferably in a natural environment.

The focus of our kindergarten is more precisely stated in our school educational program "My Day".

Here we offer you a brief description of the focus of our kindergarten:

- all-day educational process in English,
- through the circle of natural pedagogy and experiential learning to get to know and experience life on the farm, in nature, and form the child's relationship with nature,
- include new concepts and methods of creativity development such as brainstorming, situational and staging methods in the educational process,
- solving tasks by asking problematic and critical questions in order to develop critical thinking,
- develop cooperation with parents and the public through folk traditions
- creative workshops on the farm and in the nursery to develop skills and artistic sense,
- Form the basics of the second foreign language through club activities (according to parents' interest).
